## UNITED STATES DISTRICT COURT

for the  
Northern District of Ohio

In the Matter of the Search of  
*(Briefly describe the property to be searched  
or identify the person by name and address)*  
 15613 Ventnor Avenue, Cleveland, Ohio 44135  
 )  
 )  
 )

Case No.

1:15 MJ 3172

## APPLICATION FOR A SEARCH WARRANT

I, a federal law enforcement officer or an attorney for the government, request a search warrant and state under penalty of perjury that I have reason to believe that on the following person or property (*identify the person or describe the property to be searched and give its location*):

Please refer to Attachment A

located in the Northern District of Ohio, there is now concealed (*identify the person or describe the property to be seized*):

Please refer to Attachment B

The basis for the search under Fed. R. Crim. P. 41(c) is (*check one or more*):

- evidence of a crime;
- contraband, fruits of crime, or other items illegally possessed;
- property designed for use, intended for use, or used in committing a crime;
- a person to be arrested or a person who is unlawfully restrained.

The search is related to a violation of:

<i>Code Section</i>	<i>Offense Description</i>
18, USC 2252A(a)(2)(A); 18 USC 2252A(a)(5)(B);	receipt and distribution of child pornography; access or attempted access with intent to view child pornography;

The application is based on these facts:

Please refer to Attached Affidavit

- Continued on the attached sheet.
- Delayed notice of \_\_\_\_\_ days (give exact ending date if more than 30 days: \_\_\_\_\_) is requested under 18 U.S.C. § 3103a, the basis of which is set forth on the attached sheet.

*Applicant's signature*

Lisa M. Hack, FBI Special Agent

Printed name and title

Sworn to before me and signed in my presence.

Date: 7/31/2015

Judge's signature

Gregory A. White, United States Magistrate Judge

Printed name and title

City and state: Cleveland, Ohio

## **ATTACHMENT A**

### **DESCRIPTION OF LOCATION TO BE SEARCHED**

The location known as 15613 Ventnor Avenue, Cleveland, Ohio is identified as follows:  
a brick-sided ranch home with a detached garage. See Attached Photo.  
  
The premises to be searched includes any appurtenances to the real property that is the  
SUBJECT PREMISES of 15613 Ventnor Avenue, Cleveland, Ohio, and any storage  
units/outbuildings, and the vehicles registered to Adam Libbey-Tipton, having current  
registrations for Ohio license tags on a 1979 and 1987 Porsche, a 1985 Chevrolet and a 1996  
Buick, if located at the SUBJECT PREMISES.

## ATTACHMENT B

### **Information to be Seized**

The following materials, which constitute evidence of the commission of a criminal offense, contraband, the fruits of crime, or property designed or intended for use or which is or has been used as the means of committing a criminal offense, namely violations of Title 18, United States Code, Sections 2251 and 2252A:

1. Computers or storage media used as a means to commit the violations described above.
2. For any computer or storage medium whose seizure is otherwise authorized by this warrant, and any computer or storage medium that contains or in which is stored records or information that is otherwise called for by this warrant (hereinafter, "COMPUTER"):
  - a. evidence of who used, owned, or controlled the COMPUTER at the time the things described in this warrant were created, edited, or deleted, such as logs, registry entries, configuration files, saved usernames and passwords, documents, browsing history, user profiles, email, email contacts, "chat," instant messaging logs, photographs, and correspondence;
  - b. evidence of software that would allow others to control the COMPUTER, such as viruses, Trojan horses, and other forms of malicious software, as well as evidence of the presence or absence of security software designed to detect malicious software;
  - c. evidence of the lack of such malicious software;
  - d. evidence indicating how and when the computer was accessed or used to determine the chronological context of computer access, use, and events relating to crime under investigation and to the computer user;
  - e. evidence indicating the computer user's state of mind as it relates to the crime under investigation;
  - f. evidence of the attachment to the COMPUTER of other storage devices or similar containers for electronic evidence;
  - g. evidence of counter-forensic programs (and associated data) that are designed to eliminate data from the COMPUTER;
  - h. evidence of the times the COMPUTER was used;

- i. passwords, encryption keys, and other access devices that may be necessary to access the COMPUTER;
  - j. documentation and manuals that may be necessary to access the COMPUTER or to conduct a forensic examination of the COMPUTER;
  - k. records of or information about Internet Protocol addresses used by the COMPUTER;
  - l. records of or information about the COMPUTER's Internet activity, including firewall logs, caches, browser history and cookies, "bookmarked" or "favorite" web pages, search terms that the user entered into any Internet search engine, and records of user-typed web addresses; and
  - m. contextual information necessary to understand the evidence described in this attachment.
- 3. Routers, modems, and network equipment used to connect computers to the Internet.
  - 4. Child pornography and child erotica.
  - 5. Records, information, and items relating to violations of the statutes described above including
    - a. Records, information, and items relating to the occupancy or ownership of 15613 Ventnor Avenue, Cleveland, Ohio, including utility and telephone bills, mail envelopes, or addressed correspondence; Records, information, and items relating to the ownership or use of computer equipment found in the above residence, including sales receipts, bills for Internet access, and handwritten notes;
    - b. Records and information relating to the identity or location of the persons suspected of violating the statutes described above; and
    - c. Records and information relating to sexual exploitation of children, including correspondence and communications between users of Website A.

As used above, the terms "records" and "information" includes all forms of creation or storage, including any form of computer or electronic storage (such as hard disks or other media that can store data); any handmade form (such as writing); any mechanical form (such as printing or typing); and any photographic form (such as microfilm, microfiche, prints, slides, negatives, videotapes, motion pictures, or photocopies).

The term “computer” includes all types of electronic, magnetic, optical, electrochemical, or other high speed data processing devices performing logical, arithmetic, or storage functions, including desktop computers, notebook computers, mobile phones, tablets, server computers, and network hardware.

The term “storage medium” includes any physical object upon which computer data can be recorded. Examples include hard disks, RAM, floppy disks, flash memory, CD-ROMs, and other magnetic or optical media.

**AFFIDAVIT IN SUPPORT OF APPLICATION FOR SEARCH WARRANT**

**INTRODUCTION**

I, Lisa M. Hack, having been first duly sworn, do hereby depose and state as follows:

1. I have been employed as a Special Agent of the FBI since 2004, and am currently assigned to the Cleveland Division, Violent Crimes/Crimes Against Children Task Force. While employed by the FBI, I have investigated federal criminal violations related to high technology or cyber crime, child exploitation, and child pornography. I have gained experience through training at Crimes Against Children and ICAC conferences as well as everyday work relating to conducting these types of investigations. I have received training in the area of child pornography and child exploitation, and have had the opportunity to observe and review numerous examples of child pornography (as defined in 18 U.S.C. § 2256) in all forms of media including computer media. Moreover, I am a federal law enforcement officer who is engaged in enforcing the criminal laws, including 18 U.S.C. §§ 2251 and 2252A, and I am authorized by the Attorney General to request a search warrant.

2. I have probable cause to believe that contraband and evidence of a crime, fruits of a crime, and instrumentalities of violations of: 18 U.S.C. § 2251(d) and (e) (advertising, attempting to advertise, and conspiracy to advertise child pornography); 18 U.S.C. § 2252A(a)(2)(A) and (b)(1) (receipt and distribution of, conspiracy to receive and distribute, and attempt to receive and distribute child pornography); and 18 U.S.C. § 2252A(a)(5)(B) and (b)(2) (possession of, knowing access, conspiracy to access, or attempted access with intent to view child pornography), are located within 15613 Ventnor, Cleveland, Ohio (hereinafter the “SUBJECT PREMISES”). I submit this application and affidavit in support of a search warrant

authorizing a search of the SUBJECT PREMISES, as further described in Attachments A and B, incorporated herein by reference, which is located in the Northern District of Ohio. Located within the SUBJECT PREMISES to be searched, I seek to seize evidence, fruits, and instrumentalities of the foregoing criminal violations. I request authority to search the entire SUBJECT PREMISES, including the residential dwelling and any computer and computer media located therein where the items specified in Attachment B may be found, and to seize all items listed in Attachment B as contraband and instrumentalities, fruits, and evidence of crime.

3. The statements contained in this affidavit are based in part on: information provided by FBI Special Agents; written reports about this and other investigations that I have received, directly or indirectly, from other law enforcement agents, information gathered from the service of administrative subpoenas; the results of physical and electronic surveillance conducted by law enforcement agents; independent investigation and analysis by FBI agents/analysts and computer forensic professionals; and my experience, training and background as a Special Agent (SA) with the FBI. Because this affidavit is being submitted for the limited purpose of securing authorization for the requested search warrant, I have not included each and every fact known to me concerning this investigation. Instead, I have set forth only the facts that I believe are necessary to establish the necessary foundation for the requested warrant.

#### RELEVANT STATUTES

4. This investigation concerns alleged violations of: 18 U.S.C. §§ 2251(d) and (e), Advertising, and Conspiracy to Advertise, Child Pornography; 18 U.S.C. §§ 2252A(a)(2)(A) and (b)(1), Receipt, Transportation, and Distribution, and Conspiracy to Receive, Transport, and

Distribute, Child Pornography; and 18 U.S.C. § 2252A(a)(5)(B) and (b)(2), Possession and Access, or Attempted Access, with Intent to View Child Pornography.

- a. 18 U.S.C. §§ 2251(d) and (e) prohibits a person from knowingly conspiring to make, print or publish, or causing to be made, printed or published, any notice or advertisement seeking or offering: (A) to receive, exchange, buy, produce, display, distribute, or reproduce, any visual depiction, if the production of such visual depiction involves the use of a minor engaging in sexually explicit conduct and such visual depiction is of such conduct, or (B) participation in any act of sexually explicit conduct by or with any minor for the purpose of producing a visual depiction of such conduct;
- b. 18 U.S.C. §§ 2252A(a)(2)(A) and (b)(1) prohibits a person from knowingly receiving, distributing or conspiring to receive or distribute any child pornography or any material that contains child pornography, as defined in 18 U.S.C. § 2256(8), that has been mailed, or using any means or facility of interstate or foreign commerce shipped or transported in or affecting interstate or foreign commerce by any means, including by computer; and
- c. 18 U.S.C. §§ 2252A(a)(5)(B) and (b)(2) prohibits a person from knowingly possessing or knowingly accessing with intent to view, or attempting to do so, any material that contains an image of child pornography, as defined in 18 U.S.C. § 2256(8), that has been mailed, or shipped or transported using any means or facility of interstate or foreign commerce or in or affecting interstate or foreign commerce by any means, including by computer, or that was produced using materials that have been mailed or

shipped or transported in or affecting interstate or foreign commerce by any means, including by computer.

### **DEFINITIONS**

5. The following definitions apply to this Affidavit and attachments hereto:
  - a. “Bulletin Board” means an Internet-based website that is either secured (accessible with a password) or unsecured, and provides members with the ability to view postings by other members and make postings themselves. Postings can contain text messages, still images, video images, or web addresses that direct other members to specific content the poster wishes. Bulletin boards are also referred to as “internet forums” or “message boards.” A “post” or “posting” is a single message posted by a user. Users of a bulletin board may post messages in reply to a post. A message “thread,” often labeled a “topic,” refers to a linked series of posts and reply messages. Message threads or topics often contain a title, which is generally selected by the user who posted the first message of the thread. Bulletin boards often also provide the ability for members to communicate on a one-to-one basis through “private messages.” Private messages are similar to e-mail messages that are sent between two members of a bulletin board. They are accessible only by the user who sent/received such a message, or by the Website Administrator.
  - b. “Chat” refers to any kind of communication over the Internet that offers a real-time transmission of text messages from sender to receiver. Chat messages are generally short in order to enable other participants to respond quickly and in a format, that resembles an oral conversation. This feature distinguishes chatting from other text-based online communications such as Internet forums and email.

- c. "Child Erotica," as used herein, means materials or items that are sexually arousing to persons having a sexual interest in minors but that are not, in and of themselves, legally obscene or that do not necessarily depict minors in sexually explicit conduct.
- d. "Child Pornography," as used herein, is defined in 18 U.S.C. § 2256(8) as any visual depiction of sexually explicit conduct where (a) the production of the visual depiction involved the use of a minor engaged in sexually explicit conduct, (b) the visual depiction is a digital image, computer image, or computer-generated image that is, or is indistinguishable from, that of a minor engaged in sexually explicit conduct, or (c) the visual depiction has been created, adapted, or modified to appear that an identifiable minor is engaged in sexually explicit conduct.
- e. "Computer," as used herein, is defined pursuant to 18 U.S.C. § 1030(e)(1) as "an electronic, magnetic, optical, electrochemical, or other high speed data processing device performing logical or storage functions, and includes any data storage facility or communications facility directly related to or operating in conjunction with such device."
- f. "Computer Server" or "Server," as used herein, is a computer that is attached to a dedicated network and serves many users. A web server, for example, is a computer which hosts the data associated with a website. That web server receives requests from a user and delivers information from the server to the user's computer via the Internet. A domain name system ("DNS") server, in essence, is a computer on the Internet that routes communications when a user types a domain name, such as www.cnn.com, into his or her web browser. Essentially, the domain name must be translated into an Internet Protocol ("IP") address so the computer hosting the web site may be located, and the

DNS server provides this function.

- g. "Computer hardware," as used herein, consists of all equipment which can receive, capture, collect, analyze, create, display, convert, store, conceal, or transmit electronic, magnetic, or similar computer impulses or data. Computer hardware includes any data-processing devices (including, but not limited to, central processing units, internal and peripheral storage devices such as fixed disks, external hard drives, floppy disk drives and diskettes, and other memory storage devices); peripheral input/output devices (including, but not limited to, keyboards, printers, video display monitors, and related communications devices such as cables and connections), as well as any devices, mechanisms, or parts that can be used to restrict access to computer hardware (including, but not limited to, physical keys and locks).
- h. "Computer software," as used herein, is digital information which can be interpreted by a computer and any of its related components to direct the way they work. Computer software is stored in electronic, magnetic, or other digital form. It commonly includes programs to run operating systems, applications, and utilities.
- i. "Computer-related documentation," as used herein, consists of written, recorded, printed, or electronically stored material which explains or illustrates how to configure or use computer hardware, computer software, or other related items.
- j. "Computer passwords, pass-phrases and data security devices," as used herein, consist of information or items designed to restrict access to or hide computer software, documentation, or data. Data security devices may consist of hardware, software, or other programming code. A password or pass-phrase (a string of alpha-numeric

characters) usually operates as a sort of digital key to “unlock” particular data security devices. Data security hardware may include encryption devices, chips, and circuit boards. Data security software of digital code may include programming code that creates “test” keys or “hot” keys, which perform certain pre-set security functions when touched. Data security software or code may also encrypt, compress, hide, or “booby-trap” protected data to make it inaccessible or unusable, as well as reverse the progress to restore it.

- k. “File Transfer Protocol” (“FTP”), as used herein, is a standard network protocol used to transfer computer files from one host to another over a computer network, such as the Internet. FTP is built on client-server architecture and uses separate control and data connections between the client and the server.
- l. “Host Name.” A Host Name is a name assigned to a device connected to a computer network that is used to identify the device in various forms of electronic communication, such as communications over the Internet;
- m. “Hyperlink” refers to an item on a web page which, when selected, transfers the user directly to another location in a hypertext document or to some other web page.
- n. The “Internet” is a global network of computers and other electronic devices that communicate with each other. Due to the structure of the Internet, connections between devices on the Internet often cross state and international borders, even when the devices communicating with each other are in the same state.
- o. “Internet Service Providers” (“ISPs”), as used herein, are commercial organizations that are in business to provide individuals and businesses access to the Internet. ISPs

provide a range of functions for their customers including access to the Internet, web hosting, e-mail, remote storage, and co-location of computers and other communications equipment. ISPs can offer a range of options in providing access to the Internet including telephone based dial-up, broadband based access via digital subscriber line ("DSL") or cable television, dedicated circuits, or satellite based subscription. ISPs typically charge a fee based upon the type of connection and volume of data, called bandwidth, which the connection supports. Many ISPs assign each subscriber an account name – a user name or screen name, an "e-mail address," an e-mail mailbox, and a personal password selected by the subscriber. By using a computer equipped with a modem, the subscriber can establish communication with an Internet Service Provider ("ISP") over a telephone line, through a cable system or via satellite, and can access the Internet by using his or her account name and personal password.

- p. "Internet Protocol address" or "IP address" refers to a unique number used by a computer to access the Internet. IP addresses can be "dynamic," meaning that the ISP assigns a different unique number to a computer every time it accesses the Internet. IP addresses might also be "static," if an ISP assigns a user's computer a particular IP address which is used each time the computer accesses the Internet. IP addresses are also used by computer servers, including web servers, to communicate with other computers.
- q. Media Access Control ("MAC") address. The equipment that connects a computer to a network is commonly referred to as a network adapter. Most network adapters have a MAC address assigned by the manufacturer of the adapter that is designed to be a unique identifying number. A unique MAC address allows for proper routing of communications

on a network. Because the MAC address does not change and is intended to be unique, a MAC address can allow law enforcement to identify whether communications sent or received at different times are associated with the same adapter.

- r. "Minor" means any person under the age of eighteen years. See 18 U.S.C. § 2256(1).
- s. The terms "records," "documents," and "materials," as used herein, include all information recorded in any form, visual or aural, and by any means, whether in handmade form (including, but not limited to, writings, drawings, painting), photographic form (including, but not limited to, microfilm, microfiche, prints, slides, negatives, videotapes, motion pictures, photocopies), mechanical form (including, but not limited to, phonograph records, printing, typing) or electrical, electronic or magnetic form (including, but not limited to, tape recordings, cassettes, compact discs, electronic or magnetic storage devices such as floppy diskettes, hard disks, CD-ROMs, digital video disks ("DVDs"), Personal Digital Assistants ("PDAs"), Multi Media Cards ("MMCs"), memory sticks, optical disks, printer buffers, smart cards, memory calculators, electronic dialers, or electronic notebooks, as well as digital data files and printouts or readouts from any magnetic, electrical or electronic storage device).
- t. "Secure Shell" ("SSH"), as used herein, is a security protocol for logging into a remote server. SSH provides an encrypted session for transferring files and executing server programs.
- u. "Sexually explicit conduct" means actual or simulated (a) sexual intercourse, including genital-genital, oral-genital, or oral-anal, whether between persons of the same or opposite sex; (b) bestiality; (c) masturbation; (d) sadistic or masochistic abuse; or (e)

lascivious exhibition of the genitals or pubic area of any person. See 18 U.S.C. § 2256(2).

- v. "URL" is an abbreviation for Uniform Resource Locator and is another name for a web address. URLs are made of letters, numbers, and other symbols in a standard form. People use them on computers by clicking a pre-prepared link or typing or copying and pasting one into a web browser to make the computer fetch and show some specific resource (usually a web page) from another computer (web server) on the Internet.
- w. "Visual depictions" include undeveloped film and videotape, and data stored on computer disk or by electronic means, which is capable of conversion into a visual image. See 18 U.S.C. § 2256(5).
- x. "Website" consists of textual pages of information and associated graphic images. The textual information is stored in a specific format known as Hyper-Text Mark-up Language ("HTML") and is transmitted from web servers to various web clients via Hyper-Text Transport Protocol ("HTTP");

#### **BACKGROUND OF THE INVESTIGATION AND PROBABLE CAUSE**

- 6. Adam Libbey-Tipton or another user of the Internet account at the SUBJECT PREMISES has been linked to an online community of individuals who regularly send and receive child pornography via a website that operated on an anonymous online network. The website is described below and referred to herein as "Website A."<sup>1</sup> There is probable cause to believe that Adam Libbey-Tipton or

---

<sup>1</sup> The actual name of "Website A" is known to law enforcement. Disclosure of the name of the site would potentially alert its members to the fact that law enforcement action is being taken against the site and its users, potentially provoking members to notify other members of law enforcement action, flee, and/or destroy evidence. Accordingly, for purposes of the confidentiality and integrity of the ongoing investigation involved in this matter, specific names and other identifying factors have been replaced with generic terms and the website will be identified

A user of the Internet account at 15613 Ventnor Avenue, Cleveland, Ohio knowingly accessed with intent to view, receive, and/or distribute child pornography on on “Website A.”

The Network<sup>2</sup>

7. “Website A” operated on a network (“the Network”) available to Internet users who are aware of its existence. The Network is designed specifically to facilitate anonymous communication over the Internet. In order to access the Network, a user must install computer software that is publicly available, either by downloading software to the user’s existing web browser, downloading free software available from the Network’s administrators, or downloading a publicly-available third-party application.<sup>3</sup> Using the Network prevents someone attempting to monitor an Internet connection from learning what sites a user visits and prevents the sites the user visits from learning the user’s physical location. Because of the way the Network routes communication through other computers, traditional IP identification techniques are not viable.

8. Websites that are accessible only to users within the Network can be set up within the Network and “Website A” was one such website. Accordingly, “Website A” could not generally be accessed through the traditional Internet.<sup>4</sup> Only a user who had installed the appropriate software on

---

as “Website A.”

2 The actual name of the Network is known to law enforcement. The network remains active and disclosure of the name of the network would potentially alert its members to the fact that law enforcement action is being taken against the network, potentially provoking members to notify other members of law enforcement action, flee, and/or destroy evidence. Accordingly, for purposes of the confidentiality and integrity of the ongoing investigation involved in this matter, specific names and other identifying factors have been replaced with generic terms and the network will be identified as “the Network.”

3 Users may also access the Network through so-called “gateways” on the open Internet, however, use of those gateways does not provide users with the full anonymizing benefits of the Network.

4 Due to a misconfiguration, prior to February 20, 2015, Website A was occasionally accessible through the traditional Internet. In order to access Website A in that manner, however, a user would have had to know the exact IP address of the computer server that hosted Website A, which information was not publicly available. As of on or

the user's computer could access "Website A." Even after connecting to the Network, however, a user had to know the exact web address of "Website A" in order to access it. Websites on the Network are not indexed in the same way as websites on the traditional Internet. Accordingly, unlike on the traditional Internet, a user could not simply perform a Google search for the name of "Website A," obtain the web address for "Website A," and click on a link to navigate to "Website A." Rather, a user had to have obtained the web address for "Website A" directly from another source, such as other users of "Website A," or from online postings describing both the sort of content available on "Website A" and its location. Accessing "Website A" therefore required numerous affirmative steps by the user, making it extremely unlikely that any user could have simply stumbled upon "Website A" without first understanding its content and knowing that its primary purpose was to advertise and distribute child pornography.

9. The Network's software protects users' privacy online by bouncing their communications around a distributed network of relay computers run by volunteers all around the world, thereby masking the user's actual IP address which could otherwise be used to identify a user.

10. The Network also makes it possible for users to hide their locations while offering various kinds of services, such as web publishing, forum/website hosting, or an instant messaging server. Within the Network itself, entire websites can be set up which operate the same as regular public websites with one critical exception - the IP address for the web server is hidden and instead is replaced with a Network-based web address. A user can only reach such sites if the user is using the Network client and operating in the Network. Because neither a user nor law enforcement can identify the actual IP address of the web server, it is not possible to determine through public lookups

---

about February 20, 2015, Website A was no longer accessible through the traditional Internet.

where the computer that hosts the website is located. Accordingly, it is not possible to obtain data detailing the activities of the users from the website server through public lookups.

Description of "Website A" and its Content

11. "Website A" was a child pornography bulletin board and website dedicated to the advertisement and distribution of child pornography and the discussion of matters pertinent to the sexual abuse of children, including the safety and security of individuals who seek to sexually exploit children online. On or about February 20, 2015, the computer server hosting "Website A" was seized from a web-hosting facility in Lenoir, North Carolina. The website operated in Newington, Virginia, from February 20, 2015, until March 4, 2015, at which time "Website A" ceased to operate. Between February 20, 2015, and March 4, 2015, law enforcement agents acting pursuant to an order of the United States District Court for the Eastern District of Virginia monitored electronic communications of users of "Website A." Before, during, and after its seizure by law enforcement, law enforcement agents viewed, examined and documented the contents of "Website A," which are described below.

12. According to statistics posted on the site, "Website A" contained a total of 117,773 posts, 10,622 total topics, and 214,898 total members as of March 4, 2015. The website appeared to have been operating since approximately August 2014, which is when the first post was made on the message board. On the main page of the site, located to either side of the site name were two images depicting partially clothed prepubescent girls with their legs spread apart, along with the text underneath stating, "No cross-board reposts, .7z preferred, encrypt filenames, include preview, Peace out." Based on my training and experience, I know that: "no cross-board reposts" refers to a prohibition against material that is posted on other websites from being "re-posted" to "Website A;"

and ".7z" refers to a preferred method of compressing large files or sets of files for distribution. Two data-entry fields with a corresponding "Login" button were located to the right of the site name. Located below the aforementioned items was the message, "Warning! Only registered members are allowed to access the section. Please login below or 'register an account' [(a hyperlink to the registration page)] with "[Website A]." Below this message was the "Login" section, consisting of four data-entry fields with the corresponding text, "Username, Password, Minutes to stay logged in, and Always stay logged in."

13. Upon accessing the "register an account" hyperlink, there was a message that informed users that the forum required new users to enter an email address that looks to be valid. However, the message instructed members not to enter a real email address. The message further stated that once a user registered (by selecting a user name and password), the user would be able to fill out a detailed profile. The message went on to warn the user "[F]or your security you should not post information here that can be used to identify you." The message further detailed rules for the forum and provided other recommendations on how to hide the user's identity for the user's own security.

14. After accepting the above terms, registration to the message board then required a user to enter a username, password, and e-mail account; although a valid e-mail account was not required as described above.

15. After successfully registering and logging into the site, the user could access any number of sections, forums, and sub-forums. Some of the sections, forums, and sub-forums available to users included: (a) How to; (b) General Discussion; (c) [Website A] information and rules; and (d) Security & Technology discussion. Additional sections, forums, and sub-forums included (a) Jailbait – Boy; (b) Jailbait – Girl; (c) Preteen – Boy; (d) Preteen – Girl; (e) Pre-teen Videos – Girl HC; (f)

Pre-teen Videos – Boys HC; (g) Toddlers; and (h) Kinky Fetish – Scat. Based on my training and experience, I know that “jailbait” refers to underage but post-pubescent minors; the abbreviation “HC” means hardcore (i.e., depictions of penetrative sexually explicit conduct); and “scat” refers to the use of feces in various sexual acts, watching someone defecating, or simply seeing the feces. An additional section and forum was also listed in which members could exchange usernames on a Network-based instant messaging service that I know, based upon my training and experience, to be commonly used by subjects engaged in the online sexual exploitation of children.

16. A review of the various topics within the above forums revealed each topic contained a title, the author, the number of replies, the number of views, and the last post. The “last post” section of a particular topic included the date and time of the most recent posting to that thread as well as the author. Upon accessing a topic, the original post appeared at the top of the page, with any corresponding replies to the original post included in the post thread below it. Typical posts appeared to contain text, images, thumbnail-sized previews of images, compressed files (such as Roshal Archive files, commonly referred to as “.rar” files, which are used to store and distribute multiple files within a single file), links to external sites, or replies to previous posts.

17. A review of the various topics within the “[Website A] information and rules,” “How to,” “General Discussion,” and “Security & Technology discussion” forums revealed that the majority contained general information in regards to the site, instructions and rules for how to post, and welcome messages between users.

18. A review of topics within the remaining forums revealed the majority contained discussions about, and numerous images that appeared to depict, child pornography and child erotica depicting prepubescent girls, boys, and toddlers. Examples of these are as follows:

- (a) On February 3, 2015, a user posted a topic entitled "Buratino-06" in the forum "Pre-teen – Videos - Girls HC" that contained numerous images depicting child pornography of a prepubescent or early pubescent girl. One of these images depicted the girl being orally penetrated by the penis of a naked male;
- (b) On January 30, 2015, a user posted a topic entitled "Sammy" in the forum "Pre-teen – Photos – Girls" that contained hundreds of images depicting child pornography of a prepubescent girl. One of these images depicted the female being orally penetrated by the penis of a male; and
- (c) On September 16, 2014, a user posted a topic entitled "9yo Niece - Horse.mpg" in the "Pre-teen Videos - Girls HC" forum that contained four images depicting child pornography of a prepubescent girl and a hyperlink to an external website that contained a video file depicting what appeared to be the same prepubescent girl. Among other things, the video depicted the prepubescent female, who was naked from the waist down with her vagina and anus exposed, lying or sitting on top of a naked adult male, whose penis was penetrating her anus.

19. A list of members, which was accessible after registering for an account, revealed that approximately 100 users made at least 100 posts to one or more of the forums. Approximately 31 of these users made at least 300 posts. In total, "Website A" contained thousands of postings and messages containing child pornography images. Those images included depictions of nude prepubescent minors lasciviously exposing their genitals or engaged in sexually explicit conduct with adults or other children.

20. "Website A" also included a feature referred to as "[Website A] Image Hosting." This

feature of "Website A" allowed users of "Website A" to upload links to images of child pornography that are accessible to all registered users of "Website A." On February 12, 2015, an FBI Agent accessed a post on "Website A" titled "Giselita" which was created by a particular "Website A" user. The post contained links to images stored on "[Website A] Image Hosting." The images depicted a prepubescent girl in various states of undress. Some images were focused on the nude genitals of a prepubescent girl. Some images depicted an adult male's penis partially penetrating the vagina of a prepubescent girl.

21. Text sections of "Website A" provided forums for discussion of methods and tactics to use to perpetrate child sexual abuse.

- a. On January 8, 2015, a user posted a topic entitled "should i proceed?" in the forum "Stories - Non-Fiction" that contained a detailed accounting of an alleged encounter between the user and a 5 year old girl. The user wrote "...it felt amazing feeling her hand touch my dick even if it was through blankets and my pajama bottoms..." The user ended his post with the question, "should I try to proceed?" and further stated that the girl "seemed really interested and was smiling a lot when she felt my cock." A different user replied to the post and stated, "...let her see the bulge or even let her feel you up...you don't know how she might react, at this stage it has to be very playful..."

Court Authorized Use of Network Investigative Technique

22. Websites generally have Internet Protocol ("IP") address logs that can be used to locate and identify the site's users. In such cases, after the seizure of a website whose users were engaging in unlawful activity, law enforcement could review those logs in order to determine the IP addresses

used by users of "Website A" to access the site. A publicly available lookup could then be performed to determine what Internet Service Provider ("ISP") owned the target IP address. A subpoena could then be sent to that ISP to determine the user to which the IP address was assigned at a given date and time.

23. However, because of the Network software utilized by "Website A," any such logs of user activity would contain only the IP addresses of the last computer through which the communications of "Website A" users were routed before the communications reached their destinations. The last computer is not the actual user who sent the communication or request for information, and it is not possible to trace such communications back through the Network to that actual user. Such IP address logs therefore could not be used to locate and identify users of "Website A."

24. Accordingly, on February 20, 2015, the same date "Website A" was seized, the United States District Court for the Eastern District of Virginia authorized a search warrant to allow law enforcement agents to deploy a Network Investigative Technique ("NIT") on "Website A" in an attempt to identify the actual IP addresses and other identifying information of computers used to access "Website A." Pursuant to that authorization, between February 20, 2015, and approximately March 4, 2015, each time any user or administrator logged into "Website A" by entering a username and password, the FBI was authorized to deploy the NIT which would send one or more communications to the user's computer. Those communications were designed to cause the receiving computer to deliver to a computer known to or controlled by the government data that would help identify the computer, its location, other information about the computer, and the user of the computer accessing "Website A." That data included: the computer's actual IP address, and the date and time that the NIT determined what that IP address was; a unique identifier generated by the

NIT (e.g., a series of numbers, letters, and/or special characters) to distinguish the data from that of other computers; the type of operating system running on the computer, including type (e.g., Windows), version (e.g., Windows 7), and architecture (e.g., x 86); information about whether the NIT had already been delivered to the computer; the computer's Host Name; the computer's active operating system username; and the computer's MAC address.

"Revenger" on "Website A"

25. According to data obtained from logs on "Website A," monitoring by law enforcement, and the deployment of a NIT, a user with the user name "Revenger" engaged in the following activity on "Website A."

26. The profile page of user "Revenger" indicated this user originally registered an account on "Website A" on November 06, 2014. Profile information on "Website A" may include contact information and other information that is supplied by the user. It also contains information about that user's participation on the site, including statistical information about the user's posts to the site and a categorization of those posts. According to the user "Revenger" profile, this user was a Newbie Member of "Website A." Further, according to the Statistics section of this user's profile, the user "Revenger" had been actively logged into the website for a total of 34 hours, 13 minutes, and 24 seconds between the dates of November 06, 2014 and March 04, 2015.

IP Address and Identification of User "Revenger" on "Website A"

27. According to data obtained from logs on "Website A," monitoring by law enforcement, and the deployment of a NIT, on March 03, 2015, the user "Revenger" engaged in the following activity on "Website A" from IP address 23.113.149.84. During the session described below, this user browsed "Website A" after logging into "Website A" with a username and a password.

28. On March 03, 2015, the user "Revenger" with IP address 23.113.149.84 accessed the post entitled "NEW Mary 2014." Among other things, this post contained a preview for the linked video "VIDEO\_018.mp4" that depicted an adult male inserting his figures into the exposed vagina of a prepubescent girl.

29. During the following additional sessions, the user "Revenger" also browsed "Website A" after logging into "Website A" with a username and password. During these sessions, the user's IP address information was not collected.

30. On February 24, 2015, the user "Revenger" accessed the post "Pedo Moms" that contained a link to five images that depicted an adult female kissing a prepubescent boy and putting the child's penis in her mouth.

31. On March 04, 2015, the user "Revenger" accessed the post "Nude public upskirts? (request)" that contained links to 39 images that depicted prepubescent girls vaginas exposed in public. The image "wYbA4R.jpg" depicted the exposed vagina of a prepubescent girl playing on a public playground.

32. Using publicly available websites, FBI Special Agents were able to determine that the above IP Address was operated by the Internet Service Provider ("ISP") "at&t U-Verse".

33. In March 2015, an administrative subpoena/summons was served to "at&t U-Verse" requesting information related to the user who was assigned to the above IP address. According to the information received from "at&t U-Verse", Stacey Irace is receiving Internet service at the address of the SUBJECT PREMISES with an installation date of November 20, 2013 Internet service was current as of March 03, 2015 at the aforementioned premises. The Preferred Email Address on the account is "AdamL\_T@yahoo.com."

34. On or about June 25, 2015, surveillance of the SUBJECT PREMISES to be searched, as described in Attachment A, revealed that the SUBJECT PREMISES is a brick sided ranch home with a detached garage.

35. A search of Accurint information database (a public records database that provides names, dates of birth, addresses, associates, telephone numbers, email addresses, etc.) was conducted for Adam Libbey Tipton. These public records indicated that Adam Libbey-Tipton is the owner of 15613 Ventnor Ave, Cleveland, Ohio.

36. On or about June 23, 2015, I reviewed the Ohio Bureau of Motor Vehicles (BMV) database using queries for Adam Tipton. The results yielded information regarding an individual named Adam Nicholas Libbey-Tipton who is currently residing at the SUBJECT PREMISES and has current registrations in his name for Ohio license tags on a 1979 and 1987 Porsche, a 1985 Chevrolet and a 1996 Buick.

37. On or about July 1, 2015, I received information from the United States Postal Service's ("USPS") Delivery Unit that services the SUBJECT PREMISES. USPS personnel indicated that Adam Libbey-Tipton and Shaun Tipton receive mail at SUBJECT PREMISES.

38. A check of open source information from the Internet regarding Adam Nicholas Libbey Tipton shows him as a registered sex offender in the State of Ohio since 08/30/2011.

39. On or about June 25, 2015, your affiant located and reviewed the social media website of a Facebook account with the username Adam Libbey-Tipton. The profile picture of that user matches the Ohio BMV photo for Adam Nicholas Libbey-Tipton.

#### **PAST CHILD EXPLOITATION CONDUCT/ACTIVITY OF ADAM LIBBEY-TIPTON**

40. According to records maintained on the Cuyahoga County Clerk of Courts website, Adam

Nicholas Libbey-Tipton is a Tier III registered sex offender as a result of a conviction for gross sexual imposition in the case of State of Ohio v. Adam Libbey-Tipton, Cuyahoga County Common Pleas Court Case No. CR-11-549697, in which Adam Libbey-Tipton was sentenced on 08/30/2011.

#### **BACKGROUND ON COMPUTERS AND CHILD PORNOGRAPHY**

39. Computers and digital technology have dramatically changed the way in which individuals interested in child pornography interact with each other. Computers basically serve four functions in connection with child pornography: production, communication, distribution, and storage.

40. Child pornographers can now transfer printed photographs into a computer-readable format with a device known as a scanner. Furthermore, with the advent of digital cameras, when the photograph is taken it is saved as a digital file that can be directly transferred to a computer by simply connecting the camera to the computer. In the last ten years, the resolution of pictures taken by digital cameras has increased dramatically, meaning the photos taken with digital cameras have become sharper and crisper. Photos taken on a digital camera are stored on a removable memory card in the camera. These memory cards often store up to 32 gigabytes of data, which provides enough space to store thousands of high-resolution photographs. Video camcorders, which once recorded video onto tapes or mini-CDs, now can save video footage in a digital format directly to a hard drive in the camera. The video files can be easily transferred from the camcorder to a computer.

41. A device known as a modem allows any computer to connect to another computer through the use of telephone, cable, or wireless connection. Electronic contact can be made to literally millions of computers around the world. The ability to produce child pornography easily, reproduce it inexpensively, and market it anonymously (through electronic communications) has drastically changed the method of distribution and receipt of child pornography. Child pornography can be

transferred via electronic mail or through file transfer protocols (FTPs) to anyone with access to a computer and modem. Because of the proliferation of commercial services that provide electronic mail service, chat services (i.e., "Instant Messaging"), and easy access to the Internet, the computer is a preferred method of distribution and receipt of child pornographic materials.

42. The computer's ability to store images in digital form makes the computer itself an ideal repository for child pornography. The size of the electronic storage media (commonly referred to as the hard drive) used in home computers has grown tremendously within the last several years. These drives can store thousands of images at very high resolution. In addition, there are numerous options available for the storage of computer or digital files. One-Terabyte external and internal hard drives are not uncommon. Other media storage devices include CDs, DVDs, and "thumb," "jump," or "flash" drives, which are very small devices which are plugged into a port on the computer. It is extremely easy for an individual to take a photo with a digital camera, upload that photo to a computer, and then copy it (or any other files on the computer) to any one of those media storage devices (CDs and DVDs are unique in that special software must be used to save or "burn" files onto them). Media storage devices can easily be concealed and carried on an individual's person.

43. The Internet affords individuals several different venues for obtaining, viewing, and trading child pornography in a relatively secure and anonymous fashion.

44. Individuals also use online resources to retrieve and store child pornography, including services offered by Internet Portals such as Yahoo! and Hotmail, among others. The online services allow a user to set up an account with a remote computing service that provides e-mail services as well as electronic storage of computer files in any variety of formats. A user can set up an online storage account from any computer with access to the Internet. Even in cases where online storage is

used, however, evidence of child pornography can be found on the user's computer or external media in most cases.

45. As is the case with most digital technology, communications by way of computer can be saved or stored on the computer used for these purposes. Storing this information can be intentional, i.e., by saving an e-mail as a file on the computer or saving the location of one's favorite websites in, for example, "bookmarked" files. Digital information can also be retained unintentionally, e.g., traces of the path of an electronic communication may be automatically stored in many places (e.g., temporary files or ISP client software, among others). In addition to electronic communications, a computer user's Internet activities generally leave traces or "footprints" in the web cache and history files of the browser used. Such information is often maintained indefinitely until overwritten by other data.

#### **SPECIFICS OF SEARCH AND SEIZURE OF COMPUTER SYSTEMS**

46. Searches and seizures of evidence from computers commonly require agents to download or copy information from the computers and their components, or seize most or all computer items (computer hardware, computer software, and computer related documentation) to be processed later by a qualified computer expert in a laboratory or other controlled environment.

This is almost always true because of the following two reasons:

- a. Computer storage devices (like hard disks, diskettes, tapes, laser disks, magneto opticals, and others) can store the equivalent of thousands of pages of information. Especially when the user wants to conceal criminal evidence, he or she often stores it in random order with deceptive file names. This requires searching authorities to examine all the stored data that is available in order to determine whether it is

included in the warrant that authorizes the search. This sorting process can take days or weeks, depending on the volume of data stored, and is generally difficult to accomplish on-site.

- b. Searching computer systems for criminal evidence is a highly technical process requiring expert skill and a properly controlled environment. The vast array of computer hardware and software available requires even computer experts to specialize in some systems and applications, so it is difficult to know before a search which expert should analyze the system and its data. The search of a computer system is an exacting scientific procedure that is designed to protect the integrity of the evidence and to recover even hidden, erased, compressed, password-protected, or encrypted files. Since computer evidence is extremely vulnerable to tampering or destruction (which may be caused by malicious code or normal activities of an operating system), the controlled environment of a laboratory is essential to its complete and accurate analysis.

47. In order to fully retrieve data from a computer system, the analyst needs all magnetic storage devices as well as the central processing unit ("CPU"). In cases involving child pornography where the evidence consists partly of graphics files, the monitor(s) may be essential for a thorough and efficient search due to software and hardware configuration issues. In addition, the analyst needs all the system software (operating systems or interfaces, and hardware drivers) and any applications software which may have been used to create the data (whether stored on hard drives or on external media).

48. Furthermore, because there is probable cause to believe that the computer and its storage

devices are all instrumentalities of crimes, within the meaning of 18 U.S.C. §§ 2251 through 2256, they should all be seized as such.

#### **SEARCH METHODOLOGY TO BE EMPLOYED REGARDING ELECTRONIC DATA**

49. The search procedure of electronic data contained in computer hardware, computer software, and/or memory storage devices may include the following techniques (the following is a non-exclusive list, as other search procedures may be used):

- a. on-site triage of computer systems to determine what, if any, peripheral devices or digital storage units have been connected to such computer systems, a preliminary scan of image files contained on such systems and digital storage devices to help identify any other relevant evidence or potential victims, and a scan for encryption software;
- b. on-site forensic imaging of any computers that may be partially or fully encrypted, in order to preserve unencrypted electronic data that may, if not immediately imaged on-scene, become encrypted and accordingly unavailable for examination; such imaging may require several hours to complete and require law enforcement agents to secure the search scene until that imaging can be completed;
- c. examination of all of the data contained in such computer hardware, computer software, or memory storage devices to view the data and determine whether that data falls within the items to be seized as set forth herein;
- d. searching for and attempting to recover any deleted, hidden, or encrypted data to determine whether that data falls within the list of items to be seized as set forth herein (any data that is encrypted and unreadable will not be returned unless law

enforcement personnel have determined that the data is not (1) an instrumentality of the offenses, (2) a fruit of the criminal activity, (3) contraband, (4) otherwise unlawfully possessed, or (5) evidence of the offenses specified above);

- e. surveying various file directories and the individual files they contain;
- f. opening files in order to determine their contents;
- g. scanning storage areas;
- h. performing key word searches through all electronic storage areas to determine whether occurrences of language contained in such storage areas exist that are likely to appear in the evidence described in **Attachment B**; and
- i. performing any other data analysis technique that may be necessary to locate and retrieve the evidence described in **Attachment B**.

### CONCLUSION

51. Based on the foregoing, there is probable cause to believe that the federal criminal statutes cited herein have been violated, and that the contraband, property, evidence, fruits and instrumentalities of these offenses, more fully described in Attachment B of this Affidavit, are located at the SUBJECT PREMISES, described in Attachment A. I respectfully request that this Court issue a search warrant for the SUBJECT PREMISES, authorizing the seizure and search of the items described in Attachment B.

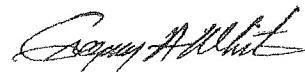

52. Your Affiant is aware that the recovery of data by a computer forensic analyst takes significant time; much the way recovery of narcotics must later be forensically evaluated in a lab, digital evidence will also undergo a similar process. For this reason, the "return" inventory will contain a list of only the tangible items recovered from the premises. Unless otherwise

ordered by the Court, the return will not include evidence later examined by a forensic analyst.

---

Special Agent Lisa M. Hack  
Federal Bureau of Investigation

Sworn to me this 31st day of July, 2015.

---

Gregory A. White  
United States Magistrate Judge

Brow  
7-21-15

## UNITED STATES DISTRICT COURT

for the

Northern District of Ohio

In the Matter of the Search of )  
 (Briefly describe the property to be searched )  
 or identify the person by name and address )  
 15613 Ventnor Avenue, Cleveland, Ohio 44135 )  
 )  
 )  
 )

Case No. 1:15 MJ 3172

## SEARCH AND SEIZURE WARRANT

To: Any authorized law enforcement officer

An application by a federal law enforcement officer or an attorney for the government requests the search of the following person or property located in the Northern District of Ohio  
 (identify the person or describe the property to be searched and give its location):

Please refer to Attachment A

The person or property to be searched, described above, is believed to conceal (identify the person or describe the property to be seized):

Please refer to Attachment B

I find that the affidavit(s), or any recorded testimony, establish probable cause to search and seize the person or property.

**YOU ARE COMMANDED** to execute this warrant on or beforeAugust 14, 2015  
(not to exceed 14 days)

in the daytime 6:00 a.m. to 10 p.m.       at any time in the day or night as I find reasonable cause has been established.

Unless delayed notice is authorized below, you must give a copy of the warrant and a receipt for the property taken to the person from whom, or from whose premises, the property was taken, or leave the copy and receipt at the place where the property was taken.

The officer executing this warrant, or an officer present during the execution of the warrant, must prepare an inventory as required by law and promptly return this warrant and inventory to United States Magistrate Judge

(name)

I find that immediate notification may have an adverse result listed in 18 U.S.C. § 2705 (except for delay of trial), and authorize the officer executing this warrant to delay notice to the person who, or whose property, will be searched or seized (check the appropriate box)     for \_\_\_\_\_ days (not to exceed 30).

 until, the facts justifying, the later specific date of*Gregory A. White*Date and time issued: 7/31/2015

Judge's signature

City and state: Cleveland, Ohio

**ATTACHMENT A**

**DESCRIPTION OF LOCATION TO BE SEARCHED**

The location known as 15613 Ventnor Avenue, Cleveland, Ohio is identified as follows:  
a brick-sided ranch home with a detached garage. See Attached Photo.  
  
The premises to be searched includes any appurtenances to the real property that is the  
SUBJECT PREMISES of 15613 Ventnor Avenue, Cleveland, Ohio, and any storage  
units/outbuildings, and the vehicles registered to Adam Libbey-Tipton, having current  
registrations for Ohio license tags on a 1979 and 1987 Porsche, a 1985 Chevrolet and a 1996  
Buick, if located at the SUBJECT PREMISES.

## ATTACHMENT B

### **Information to be Seized**

The following materials, which constitute evidence of the commission of a criminal offense, contraband, the fruits of crime, or property designed or intended for use or which is or has been used as the means of committing a criminal offense, namely violations of Title 18, United States Code, Sections 2251 and 2252A:

1. Computers or storage media used as a means to commit the violations described above.
2. For any computer or storage medium whose seizure is otherwise authorized by this warrant, and any computer or storage medium that contains or in which is stored records or information that is otherwise called for by this warrant (hereinafter, "COMPUTER"):
  - a. evidence of who used, owned, or controlled the COMPUTER at the time the things described in this warrant were created, edited, or deleted, such as logs, registry entries, configuration files, saved usernames and passwords, documents, browsing history, user profiles, email, email contacts, "chat," instant messaging logs, photographs, and correspondence;
  - b. evidence of software that would allow others to control the COMPUTER, such as viruses, Trojan horses, and other forms of malicious software, as well as evidence of the presence or absence of security software designed to detect malicious software;
  - c. evidence of the lack of such malicious software;
  - d. evidence indicating how and when the computer was accessed or used to determine the chronological context of computer access, use, and events relating to crime under investigation and to the computer user;
  - e. evidence indicating the computer user's state of mind as it relates to the crime under investigation;
  - f. evidence of the attachment to the COMPUTER of other storage devices or similar containers for electronic evidence;
  - g. evidence of counter-forensic programs (and associated data) that are designed to eliminate data from the COMPUTER;
  - h. evidence of the times the COMPUTER was used;

- i. passwords, encryption keys, and other access devices that may be necessary to access the COMPUTER;
  - j. documentation and manuals that may be necessary to access the COMPUTER or to conduct a forensic examination of the COMPUTER;
  - k. records of or information about Internet Protocol addresses used by the COMPUTER;
  - l. records of or information about the COMPUTER's Internet activity, including firewall logs, caches, browser history and cookies, "bookmarked" or "favorite" web pages, search terms that the user entered into any Internet search engine, and records of user-typed web addresses; and
  - m. contextual information necessary to understand the evidence described in this attachment.
3. Routers, modems, and network equipment used to connect computers to the Internet.
4. Child pornography and child erotica.
5. Records, information, and items relating to violations of the statutes described above including
- a. Records, information, and items relating to the occupancy or ownership of 15613 Ventnor Avenue, Cleveland, Ohio, including utility and telephone bills, mail envelopes, or addressed correspondence; Records, information, and items relating to the ownership or use of computer equipment found in the above residence, including sales receipts, bills for Internet access, and handwritten notes;
  - b. Records and information relating to the identity or location of the persons suspected of violating the statutes described above; and
  - c. Records and information relating to sexual exploitation of children, including correspondence and communications between users of Website A.

As used above, the terms "records" and "information" includes all forms of creation or storage, including any form of computer or electronic storage (such as hard disks or other media that can store data); any handmade form (such as writing); any mechanical form (such as printing or typing); and any photographic form (such as microfilm, microfiche, prints, slides, negatives, videotapes, motion pictures, or photocopies).

The term “computer” includes all types of electronic, magnetic, optical, electrochemical, or other high speed data processing devices performing logical, arithmetic, or storage functions, including desktop computers, notebook computers, mobile phones, tablets, server computers, and network hardware.

The term “storage medium” includes any physical object upon which computer data can be recorded. Examples include hard disks, RAM, floppy disks, flash memory, CD-ROMs, and other magnetic or optical media.
